## **COPYRIGHT STATEMENT**

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials including foreign works under certain conditions. In addition, the United States extends protection to foreign works by means of various international conventions, bilateral agreements, and proclamations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

The Columbia University Libraries reserve the right to refuse to accept a copying order if, in its judgement, fulfillment of the order would involve violation of the copyright law.

### FOREWORD

A letter from the Secretary of Commerce to collectors of customs and others concerned, dated October 14, 1921, contained in part the following instructions relative to the classification of exports and the preparation of the Shipper's Export Declaration:

"The kinds, quantities, and values of articles of domestic production exported to foreign countries shall be compiled from the export declaration furnished by the shipper to the collector of customs at the port of exportation, prepared on the official form—Customs Catalogue No. 7525—in accordance with the instructions of T. D. 38410. (Arts. 1023, 1026, 1030, and 1049, Customs Regulations.)

"Collectors of customs will require that the details regarding kinds and quantities of exported articles called for by this schedule be shown in the Shipper's Export Declaration. If on examination any declarations are found to be inaccurate or incomplete, either in the description of articles, or in omitting to state proper quantities and values, or insertion of the intermediate country instead of the country of final destination, or containing any error apparent on the face of the declaration, the correction thereof will be required before the declaration is accepted. (Art. 1029, Customs Regulations.)

"*Value of exports.*—The values stated should be actual selling price, if the goods are sold. If shipped on consignment without a sale having been made, the market value at the time of exportation in the ports of the United States from which exported should be stated.

"Freight and other charges from the port of departure in the United States to the place of destination in the foreign country or noncontiguous territory to which shipped must not be included in the value. (Art. 1022, Customs Regulations.)

"Value should be stated in whole dollars only, ignoring fractions of less than 50 cents and counting 50 cents and upwards as \$1. (Art. 1013, Customs Regulations.)

"*Description of articles.*—The merchandise must be described in specific and not in general terms. Such designations as 'fruits,' 'provisions,' 'groceries,' 'canned goods,' 'hardware,' 'machinery,' or any other general term must not be used, but the articles should be described in sufficient detail to permit of their classification under the proper classes of this schedule. On the other hand, the description in the declaration should not be in the detail of the invoice enumerating the various kinds and grades of similar articles which would necessitate a laborious condensation into the official classification, but should be a recapitulation of the articles contained in the shipment, with total quantity and value of each kind of article.

"The kinds of packages, boxes, barrels, bales, etc., must be specified, with quantities in the unit stated in this schedule, in net weight where required, exclusive of the weight of barrels, boxes, or other bulky coverings, and of salt or pickle in the case of salted or pickled fish and meats.

"In stating quantities, fractions of less than one-half will be ignored and fractions of one-half or over stated as whole numbers. (Art. 1013, Customs Regulations.)

"Country of destination of exports.—If the country of ultimate destination of the commodities is different from that for which the vessel or car clears or departs, collectors will require exporters and shippers or their agents to state in the shippers' declarations as the country of ultimate destination the country to which the commodities are sold or destined for a market.

"Special care should be taken to state the final destination of goods shipped through Canada to Europe and of goods to be transhipped in the United Kingdom, the Netherlands, Germany, and France to other countries."

As an aid to exporters of paper and paper products in the preparation of their export declarations, as well as for the purpose of giving each item exported a definite classification in order that this may be uniform for all shipments, the paper division of the Bureau of Foreign and Domestic Commerce has compiled the following glossary of paper terms current in the industry with each item followed by the classification and number under which it should be shown on the export declaration. The glossary, which has been alphabetically arranged, is followed by a second listing of the same terms arranged numerically by the classification number. This arrangement has been added in order that it may readily be determined just what items are included in the statistics under a given classification.

A specimen of the Shipper's Export Declaration, completed in accordance with existing instructions, is shown on the next page as an aid to those who are not already familiar with this form.

If all exporters will carefully follow the instructions and classification of items contained in this bulletin, the accuracy of the statistics covering exports of the various grades of paper and paper products will be assured.

O. M. BUTLER,  
Acting Chief, Paper Division.
